

## WEB-BASED SYSTEM

**DOC-EASY** is web-based. Your clients can view their ocean and air shipment information *in real time*. Clients (and your sales, warehouse, and office staff) can *access data safely and easily anywhere in the world*, as if they were sitting in your office. **DOC-EASY** keeps your company open for business 24 hours every day. Appropriate levels of secure access to data can be provided to clients and staff instantly, at your discretion.

## PROGRAM GENERATOR

The **DOC-EASY** Program Generator lets you *produce custom inquiries and reports* quickly and easily for your clients and your staff—without the expense of hiring a computer programmer—by pointing and clicking on any field on the screen. The Program Generator significantly reduces your monthly computer expenses.

## WINDOWS INTERFACE

**DOC-EASY** is integrated with Microsoft® products seamlessly, letting you send data directly to Microsoft Excel, Microsoft Word, and your e-mail program or fax program. With **DOC-EASY**, any document or report can be sent to Microsoft Windows® programs (such as Word), then e-mailed or faxed to any client. Data can be created and sent just as easily and quickly in EDI format or PDF format.

## COMPUTER ENVIRONMENT

Our systems run in virtually any Windows environment client, server or network. They also run on LINUX, UNIX and many proprietary operating systems. They can be hosted and integrated on CLOUD environments and they provide PRIVATE CLOUD environments.

## KEY DOCUMENTS

**DOC-EASY** is used to generate and track all documents that are required for shipment of your clients' products internationally by ocean or air. The system is installed and maintained easily and can be used in single-user and true multi-user, real-time environments. You can monitor the progress of shipments from order placement to final delivery. *Document transmittal letters* are generated easily, and you can print *cargo labels*. **DOC-EASY** also lets you *produce and track freight quotations*.

**DOC-EASY** lets you track ocean shipments easily and effectively, including all aspects of *ocean consolidation*, *full container loads*, and *cargo expediting*. And **DOC-EASY** automatically *performs rating* when ocean bills of lading are generated; rates can be pre-installed.

For ocean shipments, **DOC-EASY** quickly generates the following documents (and more):

- Delivery instructions
- Ocean bills of lading (including house bills), cargo manifests, and consolidations
- Certificates of origin
- Wood certificates
- IMO Dangerous Goods Declaration forms
- Export packing lists and commercial invoices
- CARICOM (Caribbean Commercial Invoice)
- Bank drafts
- Insurance forms
- Shippers Export Declaration (SED) forms, with Schedule B and electronic filing
- Brokerage invoices
- cost and profit statements (by shipment)

All documents are generated in English and/or metric values; conversion is performed automatically in both directions.

**DOC-EASY** lets you track air shipments easily and effectively, including all aspects of *air consolidation*. And **DOC-EASY** automatically *performs rating* when airway bills are generated; customer rates can be pre-installed.

For air shipments, **DOC-EASY** quickly generates the following documents (and more):

- Delivery instructions
- International Air Transport Association (IATA) airway bills, house airway bills, cargo manifests, and consolidations
- Certificates of origin
- Export packing lists and commercial invoices
- CARICOM (Caribbean Commercial Invoice)
- IMO Dangerous Goods Declaration forms
- Airline sales cargo reports
- Shippers Export Declaration (SED) forms, with Schedule B and electronic filing
- Cost and profit statements (by shipment)

For air and ocean shipments, the Scanning module lets you scan the driver's license of *individuals who deliver material* to your warehouse; their license numbers are tied to material receipt numbers. This module lets you *scan driver's license of individuals who pick up the material*; their license numbers are tied to packing list numbers. You can search data by license number, name, date of birth, place of birth, and much more.

The Accounting module *automates records* for billing, accounts receivable, accounts payable, payroll, and general ledger, to improve accuracy and increase your productivity. This module *creates profit-and-loss statements* that let you *analyze sales and costs* of all services performed, providing a comprehensive picture of your financial position.

**DOC-EASY** includes basic capabilities for packing and warehousing your shipments. For more extensive packing and warehousing capabilities, you'll want to add **PACK-EASY™**, the complete export packing, warehousing, material tracking, and logistics system from **Worldwide Software Systems, Inc.**
